

— A PARENT'S GUIDE

Coding Meets Vedic Maths

How THYNK builds thinking, confidence and future-ready skills — explained simply for parents.

ANCIENT WISDOM. MODERN TECHNOLOGY.

— Limitless Possibilities. —

Empowering **Young Minds** with Vedic Wisdom
and Technology for a **Smarter Tomorrow**.

Two Disciplines. One Way To Think.

Coding teaches children to think in clear, logical steps. Vedic Maths builds speed and number confidence. Together, they strengthen both computation and reasoning.

Grade 3+
Ages 9–10

Weekly
Guided Class

30 Min
1×Week

Why Coding, Early

Stronger Thinking

Big problems become small, manageable steps.

Creative Expression

From consuming content to creating it.

Resilience

Learning to debug, improve and persist calmly.

Maths Connection

Loops and patterns show maths at work.

Collaboration

Sharing projects builds real teamwork habits.

Future Readiness

Tech fluency supports almost every career.

Code Is All Around Us

From the games they play to the apps they use, technology is part of their everyday life. These familiar experiences can become exciting opportunities to discover,

What Your Child Will Learn

By the end of this module, your child can:

WHY VEDIC MATHS + CODING WORKS

An ancient Indian method using 16 concise sutras to simplify calculation and build fast, confident mental maths.

Faster Mental Maths

Pattern Recognition

Structured Thinking

Number Confidence

Scratch Skills

- Sprite movement
- Backdrops & scenes
- Sounds & voice fx

Core Code Blocks

- Sequence & order
- Loops
- If-else logic

Maths + Code

- Variables & scores
- Operators
- Vedic strategies

Mini Projects

- Counting game
- Animated story
- Score-based quiz

BY THE FINAL TERM

Every learner finishes with a real project to show – and share proudly with the family.

— TERM OVER TERM

What Changes By Year-End

Independent Problem-Solving

Big tasks get broken into clear, manageable steps.

Healthier Response To Mistakes

Errors become feedback, building a growth mindset.

A Real Project Portfolio

Visible games and animations your child is proud to share.

Calmer, Focused Mind

Vedic Maths warm-ups build focus and exam readiness.

Stronger School Marks

Logic and structure often lift maths, science and writing.

— QUESTIONS PARENTS ASK

Is my child too young to start coding?

No — ages 9–10 are ideal for pattern-based thinking.

Will this increase my child's screen time?

The goal is better screen quality, not more of it.

What if my child has never coded before?

We start from zero with beginner-friendly visual blocks.

Does this help with school academics too?

Yes — structured thinking and number speed both transfer.
